

1310nm Fiber Optic Patch Cord

Overview

This high-performance duplex fiber optic patch cord features SC UPC connectors and is designed for single-mode applications at 1310nm wavelength. Manufactured with precision ceramic ferrules and advanced grinding technology to ensure optimal performance. Produced in our facilities, each patch cord is individually tested at the test wavelengths listed on the Specs tab to ensure extinction ratio and low. 1310nm Polarization maintaining (PM) optical patch cords are widely used in polarization sensitive fiber optical systems for transmission of light that requires the PM state to be maintained. Each patch cable is manufactured. 1310nm PM Fiber Pathcord PM1310 Polarization-Maintaining Fiber FC/APC Slow Axis Align Polarization-maintaining optical fiber transmits linearly polarized light and is widely used in various fields of the national economy such as aerospace, aviation, navigation, industrial manufacturing technology. Thorlabs High-Extinction-Ratio (ER) Polarization-Maintaining Fiber Optic Patch Cables are specially designed to have a high extinction ratio and low insertion loss, as compared to our standard PM patch cables (for specific differences between the standard and high-ER cables, please refer to the.
