

8-port DIN industrial switch

Overview

The IES-8P is a rugged, unmanaged 8-port Ethernet switch designed for industrial environments. Its slim design, easy DIN rail mounting, and support for auto-negotiation and Auto-MDI-X make it ideal for fast, plug-and-play installation. The high electromagnetic compatibility (EMC) protects the DIS-100G Series from unwanted effects when operating in environments with strong. Both the 8-Port Industrial Switch (852-1102) and the 8-Port Industrial ECO Switch (852-1112) meet these requirements. The features provided by the 852-1102 Switch speak for themselves: a high data throughput of 1 Gbit as well as suitability for use in extreme ambient conditions ensure a large. PoE+ Ethernet switch, 8 Ethernet ports in M12 format, automatic detection of the data transmission speed of 10/100/1000 Mbps, jumbo frames up to 9600 bytes, coupling of network segments with different transmission speeds, autocrossing function, degree of protection IP67 Narrow Ethernet switch, five. The IES-8P is a rugged, unmanaged 8-port Ethernet switch designed for industrial environments. With reliable performance in temperatures from -40 to $+70$ °C. The GGM INS8RG is a non-manageable Industrial switch with 8 Gigabit RJ45 ports for communication between controllers and devices in automation environments. Eight auto-negotiating 10/100/1000 Mbps ports send data only to the devices.
