

Applications of German Industrial Switches

Overview

Our industrial components are used wherever reliability, compliance with standards and flexibility are required – in machine control, automation, conveyor technology or building technology. The Germany Electrical Switches market is driving economic growth through increased demand for energy-efficient solutions and smart technologies. This surge in market activity fosters job creation and promotes innovation in various sectors including construction and manufacturing. As a link between human and machine they are used in control panels of production plants, on ship command bridges, in elevators or in cockpits of industrial. We are the global market leader in cam switches specializing in industrial switches of all types. 5 kV/52 kV - “Made in Germany”.
