

Australian Plastic Cable Tray Specifications

Overview

Fiberglass reinforced plastic (FRP) anti-corrosion cable bridge or tray is made of glass fiber, epoxy resin and other special materials, it has reasonable mechanical structure, light weight, high strength, strong corrosion resistance, flame retardance, aging resistance. Fiberglass reinforced plastic (FRP) anti-corrosion cable bridge or tray is made of glass fiber, epoxy resin and other special materials, it has reasonable mechanical structure, light weight, high strength, strong corrosion resistance, flame retardance, aging resistance. EzyStrut EPT Plastic Cable Tray by Basor Electric is the ideal product for supporting cable in humid, marine or corrosive environments, or conditions where exposure to chemical products is a possibility, such as water treatment, pharmaceutical, mining, port infrastructure and metallurgical. Cable tray provides strong and reliable support for electrical wiring in commercial and industrial projects. Contractors use cable trays to route and protect cables, keeping systems organised and compliant with Australian Standards. Cable trays are able to hold heavy loads and also make. At Solar Rains, we supply custom-engineered cable tray solutions designed to meet these exact needs. It replaces traditional methods such as conduit piping or manual. Unex is a European company with over 50 years of experience in the electrical sector specialising in non-metallic cable management systems for conduction, tying, fixing, and marking of cables and tubes. Start saving now! Environmental Considerations: Outdoor, marine, and high-corrosion areas require specific materials and coatings.
