

Box for storing pigtails

Overview

Termination enclosures and cabinets are used to terminate drop fiber cables in the FTTH network. They are also known as Home Termination Boxes. They have provisions for storing spare drop cable, and splice protection sleeves, and accommodate pigtails, adapters, or field. A pig tail fibre optic terminal box is an essential component in modern fibre optic networks, providing secure termination, splicing, and distribution points for optical fibres. These enclosures protect delicate fibre connections from environmental damage and physical stress while enabling. ETC gives you the individual attention you need: prompt quotes, customized drawings, and customized product. Based on Telegärtner's decades of experience, they offer easy and reliable patching even in high density applications. Its box body is made of high quality cold-rolled steel material, and the surface of the product uses smooth electrostatic painting processing. This type of ODF is design for large splice.
