

British Galvanized Cable Tray Standards

Overview

Process: Deposits a layer of zinc onto the steel surface through electrolysis. Primary Standard: Specified in GB/T 26941. 1-2011 "Cable Trays - Part 1: General. This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. voestalpine Metsec Cable Tray Systems generally conform to BS EN 61537 Cable management - cable tray systems and cable ladder systems. Information relating to compliance is detailed/highlighted within the following sections of the standard: 6. 1 Metsec cable tray systems are metallic system. Licensed Copy: London South Bank University, London South Bank University, Tue Mar 21 09:07:17 GMT 2006, Uncontrolled Copy, (c) BSI BRITISH STANDARD Cable tray systems and cable ladder systems for cable management The European Standard EN 61537:2001 has the status of a British Standard ICS. When specifying a suitable finish for cable containment products the term 'Hot-Dip Galvanised' can be ambiguous and without the correct British Standard classification has led to much confusion and debate. The selection of material and finish is a function of the environment in which it is used in a wide range. This British Standard is the official English language version of EN 61537:2001. It is identical with IEC 61537:2001. — monitor related international and European developments and promulgate them in the UK.
