

CIF price junction box 6 pins

AI Overview

CIF pricing for a 6-pin junction box depends on the supplier, material, IP rating, and shipping destination, and must be obtained directly from manufacturers or distributors.

Overview of 6-Pin Junction Boxes 6-pin junction boxes are commonly used for consolidating wiring in industrial and commercial electrical applications. They are available in polycarbonate, aluminum, or steel housings and often feature IP67 or higher protection, making them suitable for indoor and outdoor use. Connector types include M12, M8, 7/8", or 1/2"-20UNF, and both AC and DC options are available. Some models also include visual indicators (LEDs) for port status.

Factors Affecting CIF Price

- Material and Housing Type:** Polycarbonate boxes are generally lighter and less expensive than aluminum or steel enclosures, which may affect shipping costs.
- IP Rating:** Higher protection ratings (IP66/IP67) increase manufacturing costs and may influence insurance premiums during shipping.
- Quantity Ordered:** Bulk orders typically reduce the per-unit CIF price.
- Customization:** Custom labeling, port configurations, or integrated electronics can increase the cost.
- Shipping Destination:** CIF includes cost, insurance, and freight to the port of destination, so distance and shipping method significantly affect the final price.

Recommended Suppliers

- RS Components:** Offers a wide range of junction boxes with fast delivery and datasheets for technical specifications.
- Turck Inc.:** Provides rugged 6-pin junction boxes with IP67 protection and multiple connector options, including customization for specific applications.
- Farnell UK:** Stocks junction boxes from top manufacturers like Hylec, Amphenol, and Multicomp Pro, with technical support and fast quotes.
- Rittal:** Offers small enclosures in polycarbonate, aluminum, and steel with protection up to IP66, suitable for control applications.

How to Obtain CIF Pricing

To get an accurate CIF price for a 6-pin junction box:

- Select the specific model based on material, IP rating, and connector type.
- Contact the supplier or distributor with your shipping port and quantity.
