

Cable Tray and Hanger Price Guide

AI Overview

Cable tray prices vary widely based on material, type, size, and installation complexity, ranging from \$5 to \$50 per meter, with hangers and supports adding to the total cost.

Cable Tray Material and Price

- Steel Trays:** Most common, strong, and cost-effective, typically \$5–\$25 per meter. Suitable for general-purpose installations in residential, commercial, and industrial settings.
- Aluminum Trays:** Lightweight and corrosion-resistant, ideal for humid or chemically harsh environments, priced around \$6–\$30 per meter.
- FRP (Fiberglass Reinforced Plastic) Trays:** Highly durable in aggressive environments, costing \$10–\$50 per meter.
- Stainless Steel Trays:** Premium option for high-demand, corrosion-prone areas, generally more expensive than other materials.

Cable Tray Types and Cost Considerations

- Ladder Trays:** Designed for heavy-duty routing, handle high loads and heat, more expensive upfront but cost-effective in power-heavy areas.
- Perforated Trays:** Mid-range cost, provide moderate protection, suitable for mixed routing where layouts are stable.
- Wire Mesh/Basket Trays:** Lightweight, fast to install, economical for small cables or evolving layouts, often the cheapest option initially.

Installation and Labor Costs

Labor can significantly impact total costs. Cable trays are generally faster to install than conduit systems, saving 40–60% of project labor costs due to easier cable placement and better airflow for heat dissipation. Installation complexity, number of supports, and fittings can increase costs, especially for ladder or perforated trays.

Hangers and Supports

Hangers, brackets, and supports are essential for securing trays. Prices vary depending on material and design:

- Standard steel or galvanized hangers:** Typically \$2–\$10 per unit.
- Adjustable or heavy-duty hangers:** Higher cost, often required for long spans or heavy cable loads.

Spacing: Standard support spacing is 1.5–3 meters; closer spacing increases material and labor costs.

Additional Considerations

Fittings: Elbows, tees, reducers, and junctions are priced per piece, usually \$5–\$20 each, de...
