

Cable tray binding with cable ties

Overview

If the cables are being run over a distance through cable tray, along a floorboard, or over head by j hooks, zip ties may be the right solution if applied correctly. Use cable ties to fix the PDU cables in the cabinet, to prevent PDU connectors loosening due to gravity of cables. The specifications, routing, section, and position for arranging the cables should be designed beforehand. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require. There are three items which require decisions concerning the tying down of multiconductor cables in cable tray wiring systems. Item #2 is to define the frequency at which the multiconductor. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resili- for each of these installation challenge-ience and safety. es in the industrial environment. Improper practices risk heat buildup.
