

Cable tray elbow tee models

AI Overview

Cable tray systems offer a variety of elbow and tee fittings, including horizontal and vertical elbows, horizontal tees, and cross fittings, each with specific catalog numbers and material options.

Common Cable Tray Fittings

Elbows

Horizontal Elbows: Used to change the direction of the cable tray in the horizontal plane.

Vertical Elbows: Enable elevation changes, allowing the tray to move up or down.

Materials: Galvanized steel, stainless steel, aluminum, or powder-coated finishes.

Sizes: Typically match the width and height of the straight tray sections, e.g., 50mm, 70mm, 100mm, 120mm.

Tees and Crosses

Horizontal Tee: Connects three cable tray sections at 90° angles, forming a T-junction.

Horizontal Cross: Connects four cable tray sections at 90° angles, forming a cross.

Reducers: Join trays of different widths in the same plane.

Covers: Solid or louvered tops for protection against dust, sunlight, and interference.

Model Identification

Each fitting is assigned a catalog number for ordering and reference. For example:

HNVN catalog numbers identify specific elbows, tees, and accessories for on-site installation.

Eaton B-Line series provides a submittal builder tool to filter and download CAD/BIM models of elbows, tees, and other fittings.

T&B® Cable Tray offers Helix™ fittings and a CAD library with over 4,000 drawings of elbows, tees, and related accessories.

Additional Accessories

Splice plate connectors, clamps, brackets, and hangers for installation.

Reducers and covers to adapt tray width and protect cables.

Compatibility: All fittings are designed to match the dimensions of straight tray sections and comply with IEC 61537 standards.

Resources for Detailed Model Lists

King Power Technology Catalogue: Provides sizes, types, and surface treatments for elbows and tees.

Eaton B-Line Series: Offers CAD/BIM downloads and submittal builder for elbows, tees, and accessories.

T&B® Cable Tray Catalog: Includes Helix™ fittings, cross fittings, and CAD models.
