

Commercial power distribution box markings

Overview

Indicate voltage and identify power lines, conduit, fuse boxes, switches, and other electrical equipment with safety color labels that stand out from their surroundings. Reflective— Reflective labels increase visibility in low-light conditions. Orange— Orange labels. This section specifies the type of labeling information required and includes available incident energy and personal protective equipment (PPE) categories. These requirements are echoed in NFPA 70-2017: National Electrical Code (NEC), Article 110. When each circuit is clearly marked, maintenance crews, electricians, and even first responders can quickly identify key components during an emergency. This is an internal LLNL standard meant to guide the design of new facilities, facility modifications, and.
