

Core Switch 3750

Overview

With the 3750 switch, you can optimize network performance, prioritize critical applications, and secure your data with built-in security features. The Cisco ® Catalyst ® 3750 Series Switches (Figures 1 through 4) are innovative switches that improve LAN operating efficiency by combining industry-leading ease of use and high resiliency for stackable switches. This product series features Cisco StackWise™ technology, a 32-Gbps stack. Page 2 Cisco StackWise technology unites up to nine individual Cisco Catalyst 3750 switches into a single logical unit, using special stack interconnect cables and stacking software. Forwarding Rate of the Switch Models (with two 10GbE Uplinks) is up to 101. The 3750 Series allow customers to build a unified, highly. Today I will open the box of pandora of switch virtualization :) Switch virtualization is needed for configure etherchannels or LACP over two or more devices, configuration-redundancy, single-configuration and easy network expansion.
