

## Cover of the 18-way distribution box

### AI Overview

The 18-way distribution box typically features a transparent PC (polycarbonate) cover, often hinged or press-to-open, allowing easy monitoring of circuit breakers while providing durable protection. Material and Design Most 18-way distribution boxes use a polycarbonate (PC) transparent cover combined with a metal or ABS base. The PC cover is high-strength, impact-resistant, and durable, ensuring it does not easily deform under normal use. Transparent covers allow users to observe the status of all circuit breakers without opening the box, which enhances safety and simplifies troubleshooting.

**Types of Covers**

- Hinged Cover:** Many models, such as the HT-18 waterproof box, feature a side-opening hinged cover for convenient access during wiring and inspection.
- Press-to-Open Mechanism:** Some outdoor boxes use a tool-free press-to-open hinge, which locks automatically and allows quick access without extra tools.
- Snap Closure:** Certain indoor/outdoor boxes have an intelligent snap closure that protects against water and dust, maintaining IP65 protection.

**Functionality**

- Monitoring:** Transparent covers enable visual inspection of breaker status without removing the cover.
- Protection:** Covers provide dustproof, waterproof, and impact-resistant protection, suitable for indoor and outdoor applications.
- Safety:** By preventing direct contact with live components, the cover reduces the risk of electric shock during routine checks.

**Applications**

- Indoor Use:** Homes, hotels, shops, and commercial buildings.
- Outdoor Use:** IP65-rated boxes are suitable for construction sites, PV combiner setups, factories, and industrial environments.

**Installation**

Covers are designed to be user-friendly, often hinged or snap-on, allowing easy removal or opening for maintenance. Some models include reinforced lock buckles for added security and durability. In summary, the cover of an 18-way distribution box is generally a transparent, durable PC cover, designed for easy monitoring, safety, and protection against environmental factors, with variations inc...
