

Distribution box air switch chnt

AI Overview

CHINT distribution boxes with air switches provide reliable, safe, and flexible solutions for residential, commercial, and industrial power distribution. Overview CHINT distribution boxes are designed to house circuit breakers and air switches, offering comprehensive protection for electrical circuits against overload, short-circuit, and leakage currents. They are suitable for household, commercial, and industrial applications, ensuring safe and efficient power distribution. Key Features

Reliable Brand and Quality: CHINT products undergo strict quality inspections to ensure stable operation in various environments.

Protection Functions: Air switches and circuit breakers provide overload, short-circuit, and leakage protection, safeguarding connected equipment and wiring.

Material and Safety: Many CHINT boxes, such as the NEX5 series, are made from UL94 V-0 flame-retardant ABS+PC, offering high impact resistance and electrical safety.

Modular Design: Distribution boxes support 4 to 40-pole configurations with DIN rail mounting, allowing flexible circuit organization and future expansion.

Installation Flexibility: Designed for surface-mounted or flush-mounted installation, with pre-drilled knockouts and integrated cable glands for easier wiring.

Maintenance Convenience: Compact structure and simple installation methods make it easy to maintain and replace components.

Typical Configuration

Main Air Switch: For households, a 40A or 63A air switch is commonly used depending on peak electricity demand.

Lighting Circuits: 1P+N air switches with leakage protection, typically rated 10A-20A depending on room size and number of lamps.

Socket Circuits: Kitchen sockets often use 2P miniature circuit breakers rated 32A, while living room and bedroom sockets may use 25A-40A breakers to accommodate appliances like air conditioners and TVs.

Industrial Applications: CHINT boxes can be configured with higher-rated breakers and multiple poles to meet industrial power distribution requirements.
