

Distribution box circuit breaker red light

Overview

The presence of a red light means the device is an advanced safety breaker, almost exclusively an Arc Fault Circuit Interrupter (AFCI), a Ground Fault Circuit Interrupter (GFCI), or a dual-function model combining both protections. Understanding what this light signifies is the first step toward safely restoring power and identifying the root problem in. A red light typically signifies that a breaker has tripped. When circuit breakers detect irregular electrical flow from circuits, they tend to trip. What does that mean?

Shoot us a photo of the breaker in question?

Also can you try unplugging EVERYTHING that is. A flashing red indicator on a circuit breaker is your home's electrical system waving a flag.
