

Do I still need to plug in a network cable if I have a fiber optic patch cord

Overview

The short answer is no - RJ45 connectors are designed for electrical Ethernet signals, while fiber optics transmit light pulses through glass or plastic. However, modern networks often combine both technologies. The short answer is that while the fiber optic cable itself is unique and requires specific handling and equipment, the Ethernet cable used to connect your. The short answer is no; you cannot directly plug a fiber optic cable into a typical computer without additional equipment., Cat 6a) to fiber and back again. The. At present, everyone knows that network transmission is nothing more than three methods: coaxial cable, network cable, and optical fiber. Coaxial cables have faded out of people's sight and are eliminated. This involves understanding the hardware requirements for integration, the installation and setup process, and considerations for compatibility and scalability.
