

Fiber Optic Cable Path Turn Markers

Overview

Fiber Optic Cable Markers are used to identify above or below ground cables and help prevent inadvertent disconnects and accidents. 030" UV resistant polyethylene. Mark fiber optic cables, gas pipelines, petroleum pipelines, electric lines, water lines, sewer lines, and other buried utility lines with this UV-stabilized marker. When excited by any standard marker locator, the marker ball produces a 5-foot spherical RF. One of our most durable and versatile cable markers. These markers are made useable in a wide temperature range (-40°F to 250°F). They are the best and most efficient choice. Pro-Mark is now expanding its Fiberglass Utility Marker for custom markings in city parks, golf courses and hiking trails. Pro-Mark's PM-301 Fiberglass.
