

Fiber Optic Swiss Branch

Overview

Swiss Fibre Net is a joint venture of local and regional energy providers in Switzerland. As an expert partner, it combines fragmented, local fibre-optic infrastructures to form a homogeneous, standardised, modern, nationwide and freely accessible Swiss fibre-optic net-work. The maps provide information on both fixed network connections and the availability of mobile communication networks. The media could not be loaded, either because the server or network failed or because the format is not supported. This technology enables bandwidths of up to 500 Mbit/s. But is Switzerland keeping up with its expansion?

For whom is a fibre optic connection worthwhile?

Comparis explains what you need to know.

Article Content

Swiss FibreCo Accelerates FTTH Rollout Nationwide

Swiss FibreCo, in collaboration with St. Gallisch-Appenzellische Kraftwerke AG (SAK), has announced the expansion of its Fiber-to-the-Home

Less copper, more fibre for Switzerland

Beyond 2030, we will then complete the fibre-optic network in all municipalities, which will enable us to fully retire the copper access network and make energy savings roughly equivalent to

Fiber Optic Solutions for High-Performance | Diamond SA
