

Fiber optic splice box gjs24

Overview

GJS-24-D (PLC) 24 Cores SC fiber optic joint closure is a kind of small junction box that is used to join the fiber bundles and protect them during cabling installation, preventing the cables from abrasion and other damage. Cable Enclosure Boxes is the most reliable FOSC in the world. It has many advantages: excellent waterproof performance, lightweight, small. A, sp-GJS-24C is made of high impact engineering material, with aluminum outer components and stainless screws which make the structure of the closure more stable. It can be used in aerial, duct and direct buried application. The box has 2 ports on both ends and there is a. The FSB series of indoor wall mount enclosures are designed for centralized splice-only applications. These boxes are well suited as optical cable splice collection points for DAS (Distributed Antenna Systems), MTU (Multi-Tenant Unit) commercial business applications, and MDU (Multi-Dwelling Unit). This small horizontal fiber splice closure is a compact and durable enclosure designed to protect and manage fiber optic splices in small-scale outdoor deployments, supporting max 24 core splices.
