

Fiber optic splice closure 24-core one inlet and one outlet

Overview

Compact dome-type closure supporting up to 24 fibers. Heat-shrinkable seal and sticky cincture seal for cable entry protection. IP68-rated waterproof and dustproof performance. Multiple cable inlet and outlet ports for. ABL-FSC001 In-Line Closure is suitable for connecting overhead, pipe and buried straight and branch. The closure casing is made of high-quality engineering plastics, and has good explosion-proof performance against acid and alkali salt. This small horizontal fiber splice closure is a compact and durable enclosure designed to protect and manage fiber optic splices in small-scale outdoor deployments, supporting max 24 core splices. It is well designed to provide enough space for branching and straight-through applications with 24 to 144 fiber splicing capacity. The closure can be used in the duct, buried, or overhead. It is made of tough chemical resistant engineering material which effectively prevents it from ageing caused by heat, cold, oxygen and UV radiation. The strong and rugged. Features

- RoHS compliant
- Can be used in through, branch or mid span splice locations
- Suitable for aerial, underground duct or direct burial applications
- Great mechanical performance
- Great resisting aging performance
- High air-proof, damp-proof and resisting, lightning strike performance
- Can be place.
