

Greece s geographical boundaries

Overview

The in 1828, immediately after the, had the primary task of delineating the future borders of the Greek state. presents two plans for the land border: 1. and 3.5 km north of the 2. The -- line ().

AI Overview

Greece is located in Southeastern Europe, bordered by Albania, North Macedonia, Bulgaria, and Turkey, with extensive coastlines along the Aegean, Ionian, and Mediterranean Seas. Geographical Boundaries Northern Borders: Greece shares land borders with Albania (212 km), North Macedonia (234 km), and Bulgaria (472 km) . Eastern Border: To the east, Greece borders Turkey (192 km) . Surrounding Seas: The Aegean Sea lies to the east. The Ionian Sea is located to the west. The Cretan Sea and the Mediterranean Sea are to the south . Additional Geographical Context Greece has a total area of approximately 132,000 km², with a coastline measuring about 13,676 km, making it one of the countries with the longest coastlines in the Mediterranean . The country consists of a mountainous mainland and numerous islands, with the largest islands being Crete and Evia. Greece has around 3,000 islands, many of which are located in the Aegean Sea . This geographical positioning gives Greece a significant strategic and cultural importance in the Mediterranean region, influencing its history and interactions with neighboring countries.
