

H3ccombo optical module

Overview

The H3C-compatible SFP transceiver provides up to 500m of 1000Base-BX throughput over multi-mode fibre (MMF) using 1310nm-TX/1550nm-RX wavelengths via LC simplex connectors. This bi-directional unit must be used with another transceiver or network equipment of complementary. In H3C network devices, a combo port (optical-copper multiplexing port) is a multifunctional interface that integrates two physical media: optical fiber and copper cable. Optical transmission features low loss and is fit for long distance transmission. Whether you are creating a 100-Gbps or 400-Gbps, small form-factor pluggable (SFP) module, SFP+ transceiver, XFP module, CFP, X2/XENPAK module. This video provides a comprehensive guide on configuring and troubleshooting Combo ports on H3C Ethernet switches. The demonstration illustrates how to configure Combo. Gigabit WDM/Bidi Singlemode SFP module from manufacturer Conexpro with a wavelength (Tx/Rx) of 1310/1550 nm, speed of 1 Gbps, equipped with one LC connector with UPC polishing and intended for connections at distances up to 20 km.
