

How big is a 24-position distribution box

AI Overview

A typical 24-position distribution box measures approximately 300–328 mm in length, 245–270 mm in width, and 85–100 mm in height. Detailed Dimensions and Specifications

Metal Flush-Mount Box: The Marshal MDB-24F 24-way distribution box has dimensions of 300 mm (L) x 245 mm (W) x 85 mm (H). It features a metal body with a 1.0–1.2 mm thickness and a fire-retardant ABS and transparent PC cover, with an IP40 protection rating suitable for indoor installations.

Plastic Surface-Mounted Box: The MKP12-N-04-24-41-FCN plastic distribution box measures 328 mm (L) x 270 mm (W) x 100 mm (H). It is designed for residential, commercial, and industrial use, providing IP41 protection and durable plastic construction for longevity and environmental resistance.

Additional Features

Material: Distribution boxes are commonly made from metal or flame-retardant plastic (ABS or PC), offering impact resistance and fire safety.

Mounting Type: Options include flush-mounted (embedded in walls) or surface-mounted (mounted on the wall surface) depending on installation requirements.

Protection Rating: IP40–IP41 for indoor use, with some models offering IP65 for outdoor or dust/water-resistant applications.

Internal Layout: Designed to accommodate 24 modular circuit breakers or components, often with DIN rail mounting for easy installation and maintenance.

In summary, a 24-position distribution box typically occupies a footprint of roughly 300–330 mm by 245–270 mm, with a height of 85–100 mm, and comes in both metal and plastic variants suitable for various indoor and outdoor electrical installations.
