

How much does flame-retardant cable tray cost in Portugal

AI Overview

Flame-retardant cable trays in Portugal typically range from €50 to €200 per meter depending on material, size, and fire-resistance specifications.

Material and Type Considerations Flame-retardant cable trays are commonly made from GRP (Glass Reinforced Polymer) or FRP (Fibre Reinforced Polymer), which are lightweight, corrosion-resistant, and self-extinguishing. These trays are halogen-free and meet fire safety standards such as ASTM E84 Class-1 and UL 94 V0, making them suitable for industrial, commercial, and outdoor installations. Compared to steel trays, GRP/FRP trays are lighter (up to 70% less mass), reducing installation labor and structural support costs.

Cost Factors The price of flame-retardant cable trays in Portugal depends on several factors:

- Material:** GRP/FRP trays are generally more expensive than standard steel trays due to fire-retardant and corrosion-resistant properties.
- Size and Load Capacity:** Wider trays or those designed for heavy cable loads cost more. Standard widths range from 100 mm to 600 mm, with larger sizes increasing material costs.
- Environmental Resistance:** Trays designed for outdoor, marine, or chemical-exposed environments may include UV and chemical-resistant coatings, adding to the cost.
- Accessories and Installation:** Supports, joints, connectors, and specialized mounting hardware can increase overall project costs.
- Certifications:** Compliance with IEC 61537, NEMA FG-1, or DEKRA certifications may slightly increase the price but ensures safety and regulatory compliance.

Supplier Options in Portugal Several suppliers provide flame-retardant cable trays in Portugal:

- Group Sumi:** Offers a wide range of indoor and outdoor cable trays with durable, fire-resistant materials and accessories for complete installations.
- Jeetmull Jaichandlall (P) Ltd.:** Provides custom-sized cable trays with high-quality finishing and...
