

How much does hollow polymer cable tray cost

AI Overview

Hollow polymer cable trays typically cost between \$20 and \$80 per meter, depending on size, thickness, and supplier. Polymer cable trays are lightweight, corrosion-resistant, and non-conductive systems designed for organizing and supporting electrical cables in industrial and commercial environments. Their price is generally higher than standard metal trays due to the advanced polymer materials used, which provide UV resistance, chemical resistance, and long-term durability.

Factors Affecting Price

- Tray Size and Width:** Larger trays that accommodate more cables cost more.
- Thickness and Load Capacity:** Thicker trays designed for heavier loads increase the price.
- Length of Sections:** Standard lengths are usually 2–3 meters; custom lengths may add cost.
- Accessories Included:** Some trays come with lids, couplers, and fasteners, which can affect the total price.
- Supplier and Brand:** Prices vary by manufacturer and region; premium brands may charge more for certified or specialized trays.

Comparison with Other Materials

Metal trays (steel, stainless steel) are often cheaper per meter but heavier and prone to corrosion without coatings. PVC trays are similar in corrosion resistance but may have lower heat tolerance and load capacity. For precise pricing, it is recommended to request a quote from suppliers like Apex Tray, RS PRO, or McMaster-Carr, providing details such as tray width, thickness, and quantity. Many suppliers also offer sample pieces for evaluation before bulk purchase.
