

How to connect a router to the fiber optic port on the wall

Overview

Locate the fiber optic wall outlet: This is where your ISP's fiber line enters your home.

Power on the ONT: Use the provided power adapter. To connect your fiber optic cable to a router, ensure you have the following:

Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP.

Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. Our Experts are helping user's, who are facing issues with their tech gadgets like Router, Modem and extender. This port is usually clearly identified and is different from traditional Ethernet ports.
