

How to reset an access-type PoE switch

Overview

Restore the Switch to Factory Defaults: press and hold the Reset button until all port LEDs light. The LEDs on the front panel provide switch status checking and monitoring. Use up/down arrow keys to navigate, Esc to collapse. Restoring the Lantronix SM8TAT2SA and SM24TAT2SA smart managed PoE+ switches to their factory default settings is a straightforward process that can be accomplished through the switch's management interface or, in some cases, a physical reset.

#After the connection is completed, there we recommend the super terminal, putty or Secure CRT tool to configure the switch. #Energizing the switch, then open the installed login software, select the serial port of login mode, port through the device manager to determine. The physical reset button method This is the classic "press-a-button" approach. To specify when you want PoE to switch. The TOUGHSwitch is a managed switch designed to deliver Power over Ethernet (PoE) on the 10/100/1000 ports you have configured for PoE. It also features a variety of features, including port monitoring, system connection and management services, Virtual Local Area Network (VLAN) configuration. Change Port Status LED Mode: to read port status correctly in two modes (Link/Act/Speed mode or PoE mode).
