

How to set up an APC connector

Overview

Plug the RJ-45 Ethernet cable into the PDU's console port ("IOIOI") and connect to your switch/router. Connect the RJ-12 to DB9 serial cable from the PDU's serial port ("1") to your computer or a USB-to-serial adapter if you don't have a serial port—I have them on my 12-gen and 14-gen. SmartConnect provides you with the capability to remotely manage your APC Smart-UPS devices through the SmartConnect Web Portal. The Web Portal is a cloud monitoring application where you can view the status of your device, receive advanced support, and automatic notifications about UPS events and. Your new APC UPS arrives with a manual, making setup seem simple: plug it in, connect your devices and finish. The actual process demands far more than those basic steps. The difference between a correctly configured system and a rushed setup could mean complete protection or catastrophic equipment. Welcome to this step-by-step guide on how to set up your APC by Schneider Electric Back-UPS Pro. You've made an excellent choice in safeguarding your electronics with one of the most reliable Uninterruptable Power Supplies (UPS) on the market. more Welcome.
