

Huawei 1200g Optical Module

Overview

It integrates bidirectional data transmission over one single-mode optical fibre. The GPON ONU Stick module provides an asymmetric 1.488 Gbps downstream rate to the CPE without requiring a separate power supply, reaching a link up to 20km via an SC/APC. In the AI era, Huawei provides a full range of GE to 800GE optical modules, featuring three major capabilities: Spanning (ultra-long transmission), Stable (ultra-high reliability), and Secure (ultra-solid security). Together, they ensure resilient data center interconnectivity and empower. An eSFP module is an SFP module that supports monitoring of voltage, temperature, bias current, transmit optical power, and receive optical power. Therefore, eSFP is also called SFP sometimes. It has minimum guaranteed optical budget of 34dB for XGPON and 35dB for GPON technology, with in most cases is enough to reach 20km distance.
