

Huawei Low Voltage Network Cabinet Price

AI Overview

Huawei low-voltage network cabinets typically range from around US\$890 to US\$1,350 depending on model, features, and deployment requirements.

Price Range and Models

APM30H Outdoor Cabinet: A basic version costs approximately US\$890–\$950, offering simpler maintenance and lower upfront cost, but may have higher long-term fan failure risk in dusty environments. The upgraded Ver.E model, with dual-plate heat exchangers and sealed air loops, costs around US\$1,100–\$1,350, providing longer mean time between failures and better thermal stability in harsh climates.

M50 Outdoor Cabinet: Designed for rapid FTTH deployment, this compact and lightweight cabinet supports 1-2U small equipment and flexible installation on poles or walls. While exact pricing is not publicly listed, it is positioned as a low-cost solution for network expansion, emphasizing ease of deployment and minimal secondary integration.

Factors Affecting Cost

Model and Capacity: Larger cabinets or those supporting more equipment (e.g., multiple subracks or high-capacity ODFs) are more expensive.

Power and Voltage Compatibility: Cabinets supporting both AC and DC power, or higher voltage ranges, may increase the price.

Environmental Features: Outdoor cabinets with IP55 sealing, high-efficiency heat exchangers, or corrosion-resistant materials cost more due to enhanced durability.

Customization and Installation: Additional features, such as integrated PDUs, ODFs, or specialized cooling systems, and professional installation services can significantly add to the total expenditure.

Summary

For a standard Huawei low-voltage network cabinet, expect to pay roughly US\$890–\$1,350 for typical outdoor models like the APM30H, with costs increasing for enhanced thermal management, higher capacity, or additional features. The M50 cabinet offers a cost-effective, compact alternative for...
