

Huijue Distribution Box Configuration Guide

AI Overview

The Huijue HJ-501 Low Voltage Distribution Box is configurable for safe, reliable power management with customizable dimensions, voltage ratings, and protection features.

Overview The Huijue HJ-501 distribution box is designed for both residential and commercial applications, offering durable construction with stainless steel or cold-rolled steel, corrosion resistance, and high protection levels suitable for indoor or outdoor environments (IP-rated). It supports voltage ratings from 12V to 240V and current capacities up to 100A, making it versatile for various low-voltage power distribution needs.

Configuration Options Customizable Dimensions and Layouts Boxes can be tailored in size, color, and internal layout to match project requirements. Modular compartments allow for flexible placement of breakers, fuses, and busbars.

Electrical Protection Features Integrated overload and short-circuit protection ensures safe operation. Supports secure electrical connections with precision-engineered switchgear components.

Installation Methods Can be wall-mounted or free-standing, with strong structural stability. Compact rectangular design allows space-saving installation in tight areas.

Compliance and Safety Standards Meets CCC, CE, and ISO9001 standards, ensuring quality and reliability. Suitable for industrial facilities, infrastructure, and building systems requiring long service life.

Integration with Energy Storage and Management Huijue distribution boxes can be integrated with energy storage systems (BESS) and energy management systems (EMS) for optimized power usage, peak shaving, and backup power. This is particularly useful for:

- Residential solar + storage setups (5kW-20kW systems)
- Industrial and commercial energy storage applications
- Telecom base stations requiring reliable backup power
