

IT fiber optic junction box price

AI Overview

Fiber optic junction boxes typically range from \$10 to \$150 depending on type, capacity, and features.

Price Overview

Small indoor fiber optic terminal boxes for 2–6 ports generally cost \$10–\$30 per unit on retail platforms like eBay and Amazon.

Medium-sized boxes with 12–24 ports, suitable for wall-mount or small network rooms, are priced around \$30–\$70.

High-capacity or outdoor waterproof boxes (IP65 rated) for FTTH or aerial installations can range from \$70 up to \$150 or more, depending on material (ABS/PC), splice tray capacity, and additional features like removable cassettes and multiple cable ports.

Factors Affecting Price

Port Count and Capacity: More ports or higher fiber counts increase cost. Small 2-port boxes are cheaper, while 24-port or high-count splice closures are more expensive.

Material and Durability: Outdoor-rated boxes with waterproof IP65 or IP67 ratings, UV resistance, and robust ABS/PC construction cost more than indoor-only plastic boxes.

Pre-assembled vs. DIY: Pre-assembled terminal boxes with adapters, pigtails, and splice trays are priced higher than empty enclosures.

Brand and Supplier: Established brands like HUBER+SUHNER or LAPP may charge premium prices, while wholesale suppliers on Alibaba or Made-in-China offer competitive bulk pricing.

Buying Options

Retail: eBay and Amazon offer fast shipping and small-quantity purchases suitable for individual or small-scale projects.

Wholesale: Alibaba and Made-in-China provide bulk purchasing options with customizable specifications, often at lower per-unit prices for large orders.

In summary, for typical IT and networking applications, expect to pay \$10–\$30 for small indoor boxes, \$30–\$70 for medium-sized units, and \$70–\$150+ for high-capacity or outdoor waterproof junction boxes, with prices varying based on features, materials, and supplier.
