

India Energy Internet Technology

Overview

The Ministry of Power has announced the launch of a task force to conceive the India Energy Stack (IES), a pioneering initiative aimed at creating a unified, secure, and interoperable digital infrastructure for India's energy sector. At COP26, India committed to achieving 500 GW of non-fossil electricity capacity by 2030, one of the most ambitious clean energy transitions among major economies; in the end, it achieved that five years ahead of schedule. Current structure of expedited energy transition is experienced in the form of transformation in business models of energy utility service companies and energy markets. The. "To build an open, interoperable, inclusive Digital Energy Stack that transforms India's power sector into a digitally integrated, consumer-empowered, and cost-efficient ecosystem supporting the country's clean energy goals. As India charts its path to becoming a \$5 trillion economy and.
