

Industrial-grade 10G optical module manufacturing company

AI Overview

Leading manufacturers of industrial-grade 10G optical modules include 10Gtek, FiberWDM, Topstar, and Kocent Optec, offering high-reliability, standards-compliant transceivers for demanding environments. Key Manufacturers and Offerings 10Gtek is a trusted supplier of optical transceivers, producing 10G SFP+ modules in various types including SR, LR, LRM, ER, ZR, BiDi, and CWDM/DWDM series. Their modules comply with IEEE 802.3ae and multiple SFF standards, featuring low power consumption and compatibility with data centers, metro networks, and wireless transmission networks. FiberWDM specializes in industrial-grade 10G multimode 850nm optical modules, such as the RS-10G03-85-02DI. These modules are designed for harsh environments, offering high resistance to vibration, electromagnetic interference, humidity, and extreme temperatures. They feature compact metal housings, CML and LVTTTL interface standards, and customizable pin configurations for flexible applications in medical, power, and high-altitude settings. Topstar Technology manufactures a wide range of optical modules under the “Top-trans” brand, including 10G SFP+, 40G QSFP+, and 100G QSFP28/CFP series. They provide OEM and ODM services, with a focus on R&D, high-quality production, and global customer support. Their modules are suitable for enterprise networks, data centers, and telecom infrastructure. Kocent Optec Limited, based in Hong Kong, produces 10G SFP+ transceivers for server-to-switch and switch-to-switch connections. Their industrial-grade modules support low-latency data transfer for virtualization, storage area networks, 5G mobile infrastructure, and high-definition IP surveillance networks. Kocent emphasizes reliability, competitive pricing, and global B2B support.
