

Integrated Cabling Tray

Overview

Cable trays are an integrated, highly flexible cable support system when used in combination with the matching support structures, covers and system-specific accessories. The unique shape of our cable trays results in up to 50% extra capacity in specific applications compared. Whether in workshops, shopping malls, offices or restaurants, cable trays can conduct a wide variety of cable types safely along ceilings and walls. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. We also. Discover a comprehensive range of high-quality cable trays and cable ladders at ekabel24.com - the reliable choice for safe, organized, and standards-compliant routing of power, data, and control cables. Whether you need hot-dip galvanized steel, stainless steel, or halogen-free plastic systems. With the RS 60 cable tray installation system, we offer you the last installation type of the standard support construction, so that you can implement all installations required in the building project with circuit integrity maintenance on the basis of the standard support construction.
