

Intelligent power distribution box meter

Overview

The distribution box is embedded with the DTU distribution device, distribution device power module, and distribution device power supply. By leveraging the intelligent remote monitoring function, you can remotely collect the electric meter readings and implement. The distribution network features numerous points, vast areas and complex environment, and faces problems such as high line loss, low reliability of power supply, frequent power outages, and low user satisfaction. Huawei's Intelligent Power Distribution Solution contributes to the implementation of. The KinCony Smart Distribution Box combines the powerful B32M controller and N30 Energy Meter to create a professional-grade intelligent power management solution for homes, villas, offices, RVs, hotels, and industrial automation projects. With cloud connectivity, local control, energy monitoring. Intelligent power distribution box is composed of traditional leakage protector, air switch, AC contactor and KC868-H8. It distributes electricity from the main supply to circuits while providing critical overload/short-circuit protection.
