

Lc type fiber optic connector flange

Overview

An LC (Lucent Connector) is a small form factor fiber optic connector featuring a 1.25 mm ceramic ferrule and RJ-style latch. It is widely used for single-mode and multimode connections in SFP, SFP+, and QSFP transceivers due to its compact size and low loss. There have been many types of connectors developed for fiber cable. Simplex connectors include one LC connector, one boot, a crimp ring (not included for 900-micron), a dust cap, and duplex LC connectors include two simplex connectors plus a duplexing clip. 1061271590 - Coupler Fiber Optic Connector LC Receptacle To LC Receptacle Panel Mount, Flange; Snap-In from Molex. Even as 400G/800G parallel-optics and MPO-based high-density solutions grow, LC remains essential for 10G/25G/50G/100G/200G/400G duplex.
