

Low-voltage busbar instrument transformer

Overview

Current transformers without primary winding intended to be used in low voltage bars or isolated cables. Support or signal insulators for M. 130 A, Sekundärstrom 1 oder 5 A. Weitere Learn More For over 80 years, the name RITZ has stood for first-class instrument transformers and innovative solutions in the electrical industry. More than 1,500 employees work at our nine locations in Europe, China and the USA. Initially designed for energy transfer to electromechanical systems, ITs have shifted focus towards providing high-quality. Low Voltage Current Transformers convert the primary currents which are from 20A to 5000A into 1A or 5A as secondary current in requested Accuracy and power Value. This comprehensive and compact range fits most busbars, from 30mm to 160mm width. Optional : voltage limiter to protect the current.
