

Maintenance of the New Display Cabinet

Overview

Maintain indoor relative humidity between 40–60% to prevent wood shrinkage or swelling. Use felt pads under bases to avoid scuffs, add protective bumpers behind doors or drawers, and install kick plates in high-contact zones. Small decisions about placement reduce repair frequency. The renovation of the store is completed, the exhibition cabinets of each store are almost complete, and customers have begun to make money. Regular upkeep not only enhances their appearance but also extends their lifespan. by Adam Sands, from the Community This 6-month planned preventive maintenance checklist is designed for retail display cabinets, covering critical refrigeration and operational checks. It guides technicians to verify case temperature and probe accuracy, inspect and service evaporator fans, secure. Here's what we've learned building and maintaining permanent retail fixtures since 1945: the brands that win at retail don't just install great displays—they keep them working as hard on day 1,000 as they did on day one.
