

Maldives Low Voltage Busbar System Quotation

AI Overview

Low voltage busbars in the Maldives are available from local and international suppliers, with prices varying by material, size, and amperage, typically ranging from \$50 to \$200+ per unit for standard residential or small commercial applications.

Supplier Options and Pricing

- Local Suppliers** DBLue Marine offers a range of electrical accessories including busbars, though specific prices are not listed online. They provide local delivery and support for marine and industrial applications. Metal Fort in Baa, Maldives, supplies aluminum low voltage busbars including flexible, flat, and laminated types. Aluminum busbars are cost-effective due to the lower price of the metal and are widely used for heat dissipation in power distribution systems. Prices are competitive, but exact figures depend on size, thickness, and customization.
- International Online Retailers** Desertcart Maldives lists products like the Gloaso 400A 12V copper busbar power distribution block, priced around \$120-\$150 including shipping and taxes. This product is suitable for battery banks, solar setups, marine, and automotive applications, with a maximum voltage of 48V DC and 400A current rating.

Market Trends The Maldives busbar market relies heavily on imports from China, UAE, Sri Lanka, Taiwan, and Singapore, with a concentrated market structure. Low voltage busbars are commonly used in residential, commercial, and industrial sectors. Aluminum busbars are preferred for low voltage applications due to their lightweight, corrosion resistance, and cost efficiency, while copper busbars are chosen for higher conductivity and heavy-duty applications.

Key Considerations

- Material:** Aluminum is cheaper and lighter; copper offers higher conductivity.
- Current Rating:** Ensure the busbar matches the amperage requirements of your system.
- Customization:** Many suppliers offer cutting, plating, and insulation...
