

Micro-module sunroof reset motor

Overview

Hold the button at the first detent for 15 seconds, the glass motor should reset. The sunroof will not move until you teach. A sunroof “reset,” often referred to as initialization or recalibration, is a process where the control module relearns the motor's positional memory. This memory defines the limits of travel, telling the motor exactly when to stop opening, closing, or tilting. There have been some recent threads about this problem which is a pain in the butt. Make sure the. How to Reset the Sunroof Control Module After Power Loss After a power loss, your sunroof control module often requires a reset or "relearning" proced. This is done when all windows and the roof are completely closed.
