

## Mobile fiber optic incompatible routers

### Overview

For fiber, your router needs the right WAN connection, speed support, and Wi-Fi capabilities. Routers designed for DSL (which uses phone line inputs) or cable (which uses coaxial inputs) won't . Most fiber ISPs, including Mercury, provide an ONT that connects directly to your router via an Ethernet cable. While many users ask if fiber internet needs a modem, it actually. Fiber optic internet represents a significant leap in internet technology, utilizing thin strands of glass or plastic to transmit data as pulses of light. This method offers vastly superior speeds, lower latency, and greater reliability compared to traditional copper-based technologies like DSL and. Upgrading to a router built for fiber optic means matching multi-gig WAN ports with a backplane that can actually forward packets at wire speed, not the sub-1 Gbps ceiling older hardware imposes.
