

Multi-machine AI server

Overview

Build a dedicated home AI server that runs 24/7 — serving LLMs to every device on your network. Hardware picks, networking, storage, remote access, and multi-user setup for families, teams, and tinkerers. Last updated: March 3, 2026. All hardware recommendations tested and. Our GEX-line is powered by NVIDIA GPUs with CUDA technology and is perfect for AI workloads and machine learning. By using GPU servers, we can reduce the time it takes to train models from days to hours, create larger batch sizes, work with higher resolution. Oracle is announcing Oracle Autonomous AI Database Agent-to-Agent (A2A) Server, a fully managed, multi-tenant capability embedded directly in Oracle Autonomous AI Database Serverless and Dedicated Region deployments for Oracle AI Database 19c and 26ai. Some of these operations involve deep learning, image recognition, and natural language processing. From running large language models to perfecting. Train, develop, run, and fine-tune complex models, LLMs, and agentic AI with confidence and lower TCO. Execute enterprise workloads and accelerate productivity with an Exxact GPU Server featuring NVIDIA GPUs.
