

New Zealand Fireproof Tray Cable Trays

AI Overview

Fireproof cable trays in New Zealand are constructed using materials and systems that comply with AS/NZS 3013:2005, offering fire resistance, durability, and seismic compliance for industrial and commercial projects. Materials and Types FRP (Fiberglass Reinforced Plastic) Cable Trays Lightweight, non-corrosive, fireproof, and resistant to chemicals and UV rays .Available in ladder, solid, and ventilated tray designs with pre-assembled fittings and pre-drilled straight sections for faster installation .Covers can be flat or peaked to ensure water and debris runoff, engineered for a 50-year design life . Steel Cable Trays Locally manufactured in New Zealand using trusted steel suppliers .Fireproof systems are tested to AS/NZS 3013:2005, ensuring protection of critical services during fire conditions .Seismic-compliant designs with bracing and certification according to NZS 4219 for resilient installations .Fireproofing and Passive Protection Fireproof cable trays are often integrated with passive fire protection systems, including intumescent coatings and fire-rated boards, to prevent the spread of fire, smoke, and heat through service penetrations .Products like Protecta FR Board can be used for concrete wall penetrations, finished with fire-rated acrylic sealants to maintain fire resistance and smoke safety .Certified installation ensures compliance with the New Zealand Building Code, including C/AS2 and C/VM2 requirements .Construction and Installation Considerations Pre-assembled fittings such as tees, crosses, bends, reducers, and couplers simplify installation and reduce downtime .Accurate takeoffs, BIM modeling, and professional installation by trained crews ensure tidy, safe, and efficient onsite results .Fireproof cable trays are designed to support light single wiring systems, pneumatic tubing, and critical services while maintaining long-term durability .Compliance and Certification Fireproof cable trays must meet AS/NZS 3013:2005 for fire resistance .Seismic compliance is achieved through NZS 4219-certified bracing and design .Installation by certified providers e...
