

Openfiler Fibre Channel

Overview

Openfiler supports a plethora of hardware RAID and Fibre Channel controllers and disk technologies such as SAS, SATA and SCSI. Fast, Gigabit and 10 Gigabit Ethernet controllers from Intel and Broadcom can also be integrated to provide high bandwidth access to data over a TCP/IP. Let's jump right into Openfiler's capabilities around SAN storage. Openfiler, being open-source, allows you to set up your own SAN environment without breaking the bank. Courseplay allows players to create and manage automated tasks for their vehicles, while AutoDrive allows them to create and follow customisable AI paths. By combining these two mods, players. Openfiler converts an industry standard x86_64 architecture system into a full-fledged NAS/SAN appliance or IP storage gateway and provides storage administrators with a powerful tool to cope with burgeoning storage needs. It supports CIFS, NFS, HTTP/DAV, FTP, and iSCSI.
