### Overview

The 8152A Optical Average Power Meter provides the accuracy and versatility for absolute and relative power measurements in a fiber optic test environment. All functions can be set manually via front panel controls, or programmed via GPIB for complete remote control. Our optical power meters feature built-in calibration factors. The HP 8152A display range is +30dBm to - 80dBm. 01dBm/dB Other specification relies on the properties of the optical head used. If this website says we have the item in stock, we do.
