

Panel for direct connection of telecommunications fiber optic cable

Overview

Fiber patch panel is widely used in local telephone, agricultural network system, data, image transmission system and CATV cable TV series. It is used for direct connection and branch connection of indoor optical fiber, and plays the role of storage of tail fiber disk and. Fiber optic patch panels are enclosures that act as a distribution hub for fiber cable. A bulk (multi-strand) fiber cable enters the patch panel and then each fiber strand is separated into individual strands or pairs of strands. Designed for reliability and ease of use, our rack-mount and wall-mount solutions provide the perfect environment for splicing, terminating, and managing your critical fiber optic connections. Our 19-inch rack-mount panels are constructed from.
