

Price List for Cable Trays and Trays in Algeria

AI Overview

The price of tray-type cable trays in Algeria varies widely depending on material, size, type, and supplier, with local manufacturing and import factors influencing costs.

Overview of Cable Trays in Algeria

Tray-type cable trays, also known as trough or perforated trays, are widely used in Algeria for industrial, commercial, and infrastructure projects. They are available in galvanized steel, stainless steel, and FRP (fiber-reinforced plastic), with different thicknesses and dimensions to suit specific applications. Common sizes include widths from 50mm to 300mm and lengths of 2.5–3 meters. Accessories such as bends, T-pieces, and risers are also available, which can affect the overall cost.

Factors Affecting Price

Material: Galvanized steel is generally more affordable than stainless steel or FRP, while corrosion-resistant coatings or painted finishes can increase costs.

Dimensions and Thickness: Larger trays with thicker sheets support heavier cable loads but are more expensive.

Type and Design: Ladder, perforated, and trough designs have different manufacturing complexities, impacting price.

Local vs Imported: Algeria relies on a mix of domestic fabrication and imports, with imported trays often costing more due to shipping and customs.

Project Scale and Customization: Bulk orders or custom configurations may reduce unit costs, while small or specialized orders can be pricier.

Market Context

The Algerian cable tray market is influenced by infrastructure modernization, energy projects, and industrial expansion. Local manufacturers and international suppliers compete, and pricing is sensitive to technical standards, local content regulations, and material availability. Suppliers like Bahra Electric and local Algerian manufacturers offer a range of options, emphasizing durability, safety, and compliance with national and international standards.
