

Price List for Distribution Box Shells

AI Overview

Distribution box shell prices typically range from \$20–\$500 per unit depending on material, size, and application, with industrial-grade or weather-resistant units costing more.

Typical Price Ranges

- Residential Plastic Shells:** Basic ABS or PVC plastic shells for single-phase residential units generally cost \$20–\$100 per unit, depending on size and IP rating for moisture protection.
- Commercial/Industrial Metal Shells:** Powder-coated steel or stainless steel enclosures for three-phase or high-capacity systems range from \$150–\$500 or more per unit, reflecting durability, corrosion resistance, and compliance with safety standards.
- Custom or OEM Units:** Customized shells with specific dimensions, busbar configurations, or branding can increase costs, with per-unit pricing decreasing for bulk orders.

Factors Affecting Pricing

- Material Construction:** Plastic shells are cheaper but less durable; steel or stainless steel shells offer higher longevity and corrosion resistance, especially in outdoor or industrial environments.
- Size and Capacity:** Larger shells accommodating more circuits or higher amperage increase material and manufacturing costs.
- Weather and Environmental Ratings:** Outdoor-rated or IP-certified enclosures for moisture and dust protection carry a premium.
- Integrated Features:** Smart monitoring, surge protection, or remote control modules add to the base shell cost.
- Volume and Procurement Method:** Wholesale or bulk orders reduce per-unit costs, while custom or low-volume orders are more expensive.

Cost Considerations Beyond the Shell

While the shell itself is a key cost component, total investment may include installation, internal components (breakers, busbars), and long-term maintenance. High-quality shells reduce replacement frequency and operational risks, offering better long-term value despite higher upfront costs.

Summary

For budgeting purposes, standard distribution box shells can be expected to cost \$20–\$100 for basic residential plastic units and \$150–\$500+ for commercial or industrial metal units, w...
