

Price of Cable Tray Guide Rollers

AI Overview

Cable tray cable laying rollers typically range from \$50 to \$300 per unit, depending on material, size, and load capacity. Overview Cable laying rollers are essential for guiding and supporting cables in industrial and commercial cable tray systems. They come in various materials such as aluminum, steel, PVC, and high-strength nylon, and are designed to handle different cable diameters and weights. Common features include ball bearings for smooth rotation, galvanized or electroplated frames for corrosion resistance, and adjustable widths to fit standard cable trays. Price Factors Material: Aluminum and steel rollers are generally more expensive than PVC or plastic rollers due to durability and load capacity. Load Capacity: Rollers designed for heavier cables (up to 600 kg) cost more than those for lighter cables (around 250 kg). Size and Diameter: Larger rollers that accommodate bigger cable diameters (up to 200 mm) are priced higher. Special Features: Rollers with mounting clamps, electrogalvanized frames, or specialized designs for underfloor or shaft installations may increase the cost. Typical Price Range Light-duty rollers (plastic or small aluminum, up to 250 kg capacity): \$50-\$100 per unit. Medium-duty rollers (aluminum or steel, 250-500 kg capacity): \$100-\$200 per unit. Heavy-duty rollers (high-strength nylon or steel, 500-600 kg capacity, large diameter): \$200-\$300 per unit. Where to Buy Industrial suppliers like Direct Industry and Katimex offer a wide range of cable tray rollers with detailed specifications. Online marketplaces such as Amazon and McMaster-Carr provide quick access to standard rollers, often with same-day delivery options. When selecting rollers, consider the cable type, installation environment, and load requirements to ensure safety and efficiency during cable laying operations.
